DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 15-17, drawn to a piezoelectric thin film of perovskite crystals.

Group II, claim(s) 7-9, drawn to a method of manufacturing a piezoelectric thin film.

Group III, claim(s) 10-14, drawn to a piezoelectric thin film of perovskite crystals formed on a substrate by a sol-gel process.

The inventions listed as Groups I - III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is the surface of the piezoelectric thin film includes crystal grains having an equivalent circle diameter of 200 nm or more, and those having an equivalent circle diameter of 40 nm or less, which is not shared with Groups II and III. The special technical feature of Group II is the method of manufacturing the piezoelectric thin film comprising the steps of repeating the steps (a) and (b) three times or more and ten times or less to thereby form the piezoelectric thin film in which the plurality of piezoelectric layers are stacked, which is not shared with Groups I and III. The special technical feature of Group III is a difference between a maximum value and a minimum

value of y in an arbitrary portion of the piezoelectric thin film is 0.05 or less, which is not shared with Groups I and II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
